

37. NFA START AND END WITH DIFFERENT SYMBOLS

=====

```
#include <stdio.h>
```

```
#include <string.h>
```

```
int main() {
```

```
    char s[100];
```

```
    int n;
```

```
    printf("Enter string over {a,b}: ");
```

```
    scanf("%s",s);
```

```
    n=strlen(s);
```

```
    if(n>=2 && s[0]!=s[n-1])
```

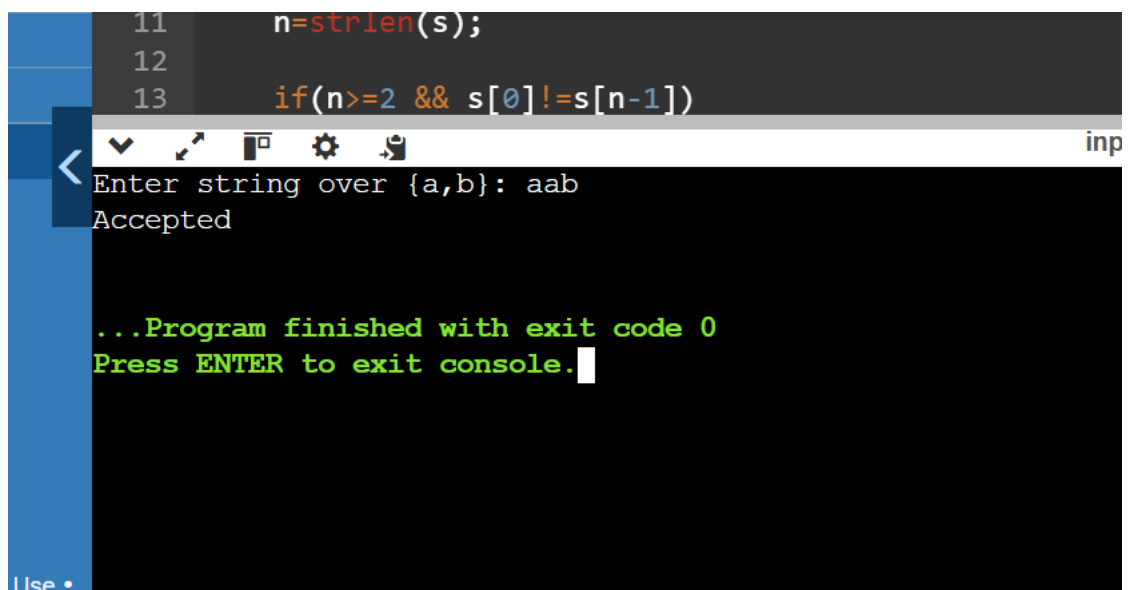

```
        printf("Accepted\n");
```

```
    else
```

```
        printf("Rejected\n");
```

```
    return 0;
```

```
}
```

The screenshot shows a terminal window with a dark background. At the top, the C code from the previous block is visible, with lines 11, 12, and 13 highlighted. Line 11 is `n=strlen(s);`, line 12 is `if(n>=2 && s[0]!=s[n-1])`, and line 13 is `printf("Accepted\n");`. Below the code, the terminal shows the prompt `Enter string over {a,b}: aab` and the output `Accepted`. At the bottom, a green message reads `...Program finished with exit code 0` and `Press ENTER to exit console.` with a cursor. The terminal window has a blue sidebar on the left and a title bar at the top with standard icons and the text 'inp'.
